## DETAILED ACTION

### *Drawings*

1. The drawings are objected to: **all photographs must be replaced by drawings.**

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. **The objection to the drawings will be held in abeyance.**

### *Claim Rejections - 35 USC § 112*

2. Claims 1, 5-6, and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5-6 do not comply with the requirements of the 35 U.S.C. 112, second paragraph. Ex parte Simpson, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name “Harley Davidson” cannot be used properly to identify any particular

material or product. In fact, the value of a trademark would be lost to the extent that it became descriptive of a product, rather than used as an identification of a source or origin of a product. Thus, the use of a trademark or trade name in a claim to identify or describe a material or product would not only render a claim indefinite, but would also constitute an improper use of the trademark or trade name.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Regarding claim 9, "original fasteners" has no antecedent basis.

***Claim Rejections - 35 USC § 102/103***

3. Claims 1, 5, 9, 13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Puluso (6401998). Puluso teaches a rack having a mounting plate 97, a mounting block 102, a cradle 20, a mounting bracket 27 with a hole, and a cradle fastener 105.

4. Claims 10, 11, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Puluso in view of Abbott (5727642), and further in view of Laesch (4387836). Abbott teaches that it is known in the art to provide a cradle having rods and a connector strap. It would have been obvious to one of ordinary skill in the art to provide a cradle having rods and connector straps in Puluso as taught by Abbott to provide an alternative cradle for holding the gold bag.

Laesch teaches that it is known in the art to provide additional posts for holding a golf bag. Furthermore, it would have been obvious to one of ordinary skill in the art to provide additional posts and straps to provide added rigidity.

5. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Puluso in view of Gogan et al. (5664715). Gogan teaches that it is known in the art to provide a threaded bolt mounted through the threaded holes as shown in fig. 6. It would have been obvious to one of ordinary skill in the art to provide threaded holes in the cradle mounting plate and the mounting block in Puluso as taught by Gogan to provide an alternative fastening means.

6. Claims 1, 2, 5-9, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Aron (6293450). Aron teaches a rack having a mounting plate 32, a mounting block 42, a cradle 10, and a mounting bracket 12 and a cradle fastener 52.

Regarding claim 2, note the curved recess in the plate 32.

7. Claims 3, 4, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aron in view of Hann (5762249). Aron meets all claimed limitations except for the bracket is mounted at an inclined angle. Hann teaches that it is known in the art to provide a bracket mounted at an inclined angle. It would have been obvious to one of ordinary skill in the art mount the bracket of at an inclined angle, e.g. 30 degrees, in Aron as taught by Hann to prevent damage and/or accident.
